

KNOW

80 to 90% of kids have been approached for something online.

LEARN

Use the same phone or computer system as your child.

Let your child teach you about using technology.

Know the apps and software your child is using.

PROTECT

Activate safety settings and parental controls on all devices.

Turn on Google Safe Search.

Use online software to control Internet content.

Controls downloads through password protection

ENFORCE

-  Set — and enforce — screen time rules and consequences.
-  Know the passwords.
-  Check your child's devices at random intervals.
-  Create a central charging station in your house.
-  Know your kids aren't where you think they are online.
-  Every so often, open each app.
-  Remember: Cell phones are computers.

FOLLOW

“Friend” or “follow” your child on every account they have.

Be aware kids will try to “beat the system.”

Randomly check your child's search history.

TEACH YOUR KIDS

NOTHING is private on the Internet. ALL pictures can be saved.

It's okay to tell you about anything that happens online

Don't send pictures of your private parts to ANYONE.

A good digital role model.
Persistent and consistent.
A proactive parent.
